Collected Knowledge & Wisdom on

Diceful API

Provides:

This API provides dice rolling functionality. You can simulate rolling 6-sided or 20-sided die. You can also roll batches of die. The API will return a JSON object with the results of the roll. You may also access images of dice through the API.

Key Provisioning:

- No key required!

Quotas:

- None

Pain factor (*0=ezpz...5=nightmare*): _0_

The Good:

- Super easy to use, with no keys or quotas
    - API call follows this format: http://roll.diceapi.com/json/2d6/d20
        - In the example call above, you are simulating rolling two 6-sided dice and one 20-sided die
- Responses can be formatted as html (default), text/html, application/json

The Bad:

- Functionality only provided for 6-sided and 20-sided die

The Ugly:

- None
